

Calibrand innovates in e-Assessment delivery with A-CAT - Anytime Console Assessment & Testing at Learning & Skills showcase

26 January 2010, Derby, UK

Calibrand will be demonstrating their A-CAT (Anytime Console Assessment & Testing) e-Assessment delivery system at the Learning and Skills 2010 event at Olympia 2 on January 27-28.

Calibrand's Managing Director Denis Saunders explains:

"Organisations love the benefits and efficiencies of e-Assessment, but don't always want to tie up expensive PCs and training suites to deliver on-screen tests.

Students want to access training and assessment to fit in with their lifestyle and learning choices. Calibrand's ethos of delivering assessment in multiple ways is a perfect fit for this challenge."

Learning and Skills delegates will have the opportunity to win two new A-CAT enabled Sony PSP Go devices at Calibrand's Stand 150 throughout the event.

Denis continues:

"Formative e-Assessment delivered on PSPs, netbooks and smartphones is a natural, innovative progression for Calibrand.

The A-CAT provides immediate feedback with insight to support learning in the workplace, at home and other environments."

With almost 200 exhibitors over 2 days, Calibrand's A-CAT demonstration at Stand 150 is front-of-house at Olympia 2, located at the main entrance.
