

[Calibrand](#) now on [Digital Outcomes and Specialists framework](#)

This new framework is a replacement for Digital Services 2 (DS2) and is part of the [Digital Market Place](#) which aims to be the single point of reference for Public sector buyers.

The addition of [Calibrand](#) on the framework marks another commitment by Calibrand to ensure it is easily accessible to all Public Sector organisations.

The framework provides access to a number of services such as:

- Digital Outcomes
  - User experience and design
  - performance analysis and data
  - service delivery
  - service development
  - Support and operations
  - testing and auditing
- Digital Specialists
  - business analyst
  - delivery manager or project manager
  - designer
  - developer
  - product manager
  - service manager
  - technical architect
  - web operations engineer

For our full offering please login to your [Digital Services Store](#) account and search for Calibrand.

Managing Director of [Calibrand](#), Denis Saunders, said:

*"The Digital Outcomes and Specialists framework will provide all public sector organisations with a multitude of easily accessible human and physical resources. This is a natural addition to the government's [GCloud 7](#) framework that Calibrand is already on."*

### **About Calibrand**

[Calibrand](#), the currency for talent®, specialises in providing e-assessment solutions that assess, monitor, measure, benchmark, track and test people during periods of employment and training. We have delivered over nine million online assessments covering multiple-choice, essay, case-study and portfolio based solutions. We have particular strength in the financial sector working with banks, insurance companies and awarding bodies to provide qualifications, competency assurance, certifications and licenses on a global basis.

### **About Digital Outcomes and Specialists**
