

Calibrantest is now certified as Learning Tools Interoperability® (LTI®) v1.0 & 1.1 compliant by IMS Global.

This marks a great step forward as **Calibrant** continues to invest and improve its products and services, for the benefit of our customers.

The principal concept of LTI is to establish a standard way of integrating rich learning applications, such as **Calibrantest**, together. This seamless integration of web-based systems can only increase the competitive advantages for our customers and users in the future.

Managing Director of **Calibrant**, Denis Saunders, said:

“As we continue to deliver world-class leading software to our customers we hope that this certification helps us integrate with other LTI approved systems seamlessly and quickly.”

About Calibrant

Calibrant, the currency for talent®, specialises in providing e-assessment solutions that assess, monitor, measure, benchmark, track and test people during periods of employment and training. We have delivered over nine million online assessments covering multiple-choice, essay, case-study and portfolio based solutions. We have particular strength in the financial sector working with banks, insurance companies and awarding bodies to provide qualifications, competency assurance, certifications and licenses on a global basis.

About LTI

LTI is a registered trademark of [IMS Global Learning Consortium](https://www.imsglobal.org/activity/learning-tools-interoperability). For further information regarding this standard please visit: <https://www.imsglobal.org/activity/learning-tools-interoperability>
